

# Innovation in Life's Medical Technology

## LIV Hospital Ulus / Istanbul - Turkey

Area of 30.000 m<sup>2</sup>  
9 operating theatres  
160 hospital beds  
7 neonatal care units  
7 cardiovascular care units  
8 intensive care units

## Foreword by Hasan Sahin

**This history of ACENDIS starts with the founding of Delta Trade Company 18 years ago. In January 2009, we changed the name of the company to ACENDIS. During the course of these past eighteen years, ACENDIS has successfully completed more than 115 TURN-KEY PROJECTS with leading hospitals in Turkey and neighbouring countries.**

The health care sector in Turkey has advanced greatly in recent years. Both public and private hospitals in Turkey have achieved international standards physically and technologically. Turkish doctors routinely perform very successful operations. The recent Turkish health reform has resulted in patients being afforded improved hospital services. In addition to these factors, favourable health-care pricing places Turkey in a strong position in the field of international medicine.

It is our prime goal to provide the healthcare sector both in Turkey, as well as other countries, with high-quality equipment at economic prices. Our portfolio includes intelligent, modern systems, the specifications of which meet the highest standards. We are in a position to offer state-of-the-art equipment and finest after-sales service through our partnerships with well-known medical companies and

years of experience. We assist our clients right from the initial planning stage, carrying on right through to consulting and the supply of equipment for on-going projects – at interesting prices. We also offer financial solutions, so as to achieve the required conditions during and after the sale.

We are becoming increasingly involved in the development of global projects through our special connections in the Turkish market and the Middle East. We have, for example, recently gained access to the African market through our business partners in Switzerland and Portugal. We are also steadily expanding our activities in Russia and the CIS states.

We implement joint projects in cooperation with our partners. And we are also the authorised representatives of several companies in Turkey. This collaborative work means that we are in a position to offer our clients the ACENDIS philosophy on an on-going basis: projects and state-of-the-art medical equipment at economic prices. And it is with your support that we want to visualise and implement new projects.

Our strength is dependent on tracking and implementing innovations in the field of medicine...

With kindest regards,

Hasan ŞAHİN

Chairman of the Board of  
ACENDIS

## HISTORY OF ACENDIS

### Philosophy – Targets – Visions

Our philosophy – a contribution to a better and healthier life

Satisfied clients and patients all over the world

Medical projects – one-stop solutions

Worldwide network of medical facilities for the interchange of medically relevant information

Consolidation and expansion of our medical competence

The ACENDIS corporate headquarters is located in the heart of Europe, home to global leaders in medical technology. Our proximity to major manufacturers has made it possible for us to establish especially strong links, which we are able to make available to our clients by way of knowledge transfer and procurement streamlining.

Our particular connections with the Turkish market and the Middle East have resulted in an increase in the development of global projects by ACENDIS. We have also recently gained access to the African market through our partner companies in Switzerland and Turkey. We are stepping up our activities in Russia and the CIS states, as well.

The experience we have gathered over the past 18 years puts us in a position to confidently organise and implement sophisticated procurement projects in medical technology for private clinic and hospital operators on an international scale. And it is here that we are able to take full advantage of our organisational and procurement knowledge „Made in Germany“.

## International projects with strong partners – success that speaks for itself

ACENDIS - Hanover, Germany

ACENDIS - Istanbul, Turkey

SCHILLER - Istanbul, Turkey

IHG - International Health Group - Baku, Azerbaijan

DELTA TRADE COMPANY - Istanbul, Turkey

DTS - Dijital Teknoloji Servisi - Istanbul, Turkey

Richard Wolf - Istanbul

Al Mansouryah - Riyadh, Kingdom of Saudi Arabia

Medical Engineering Equipment & Services

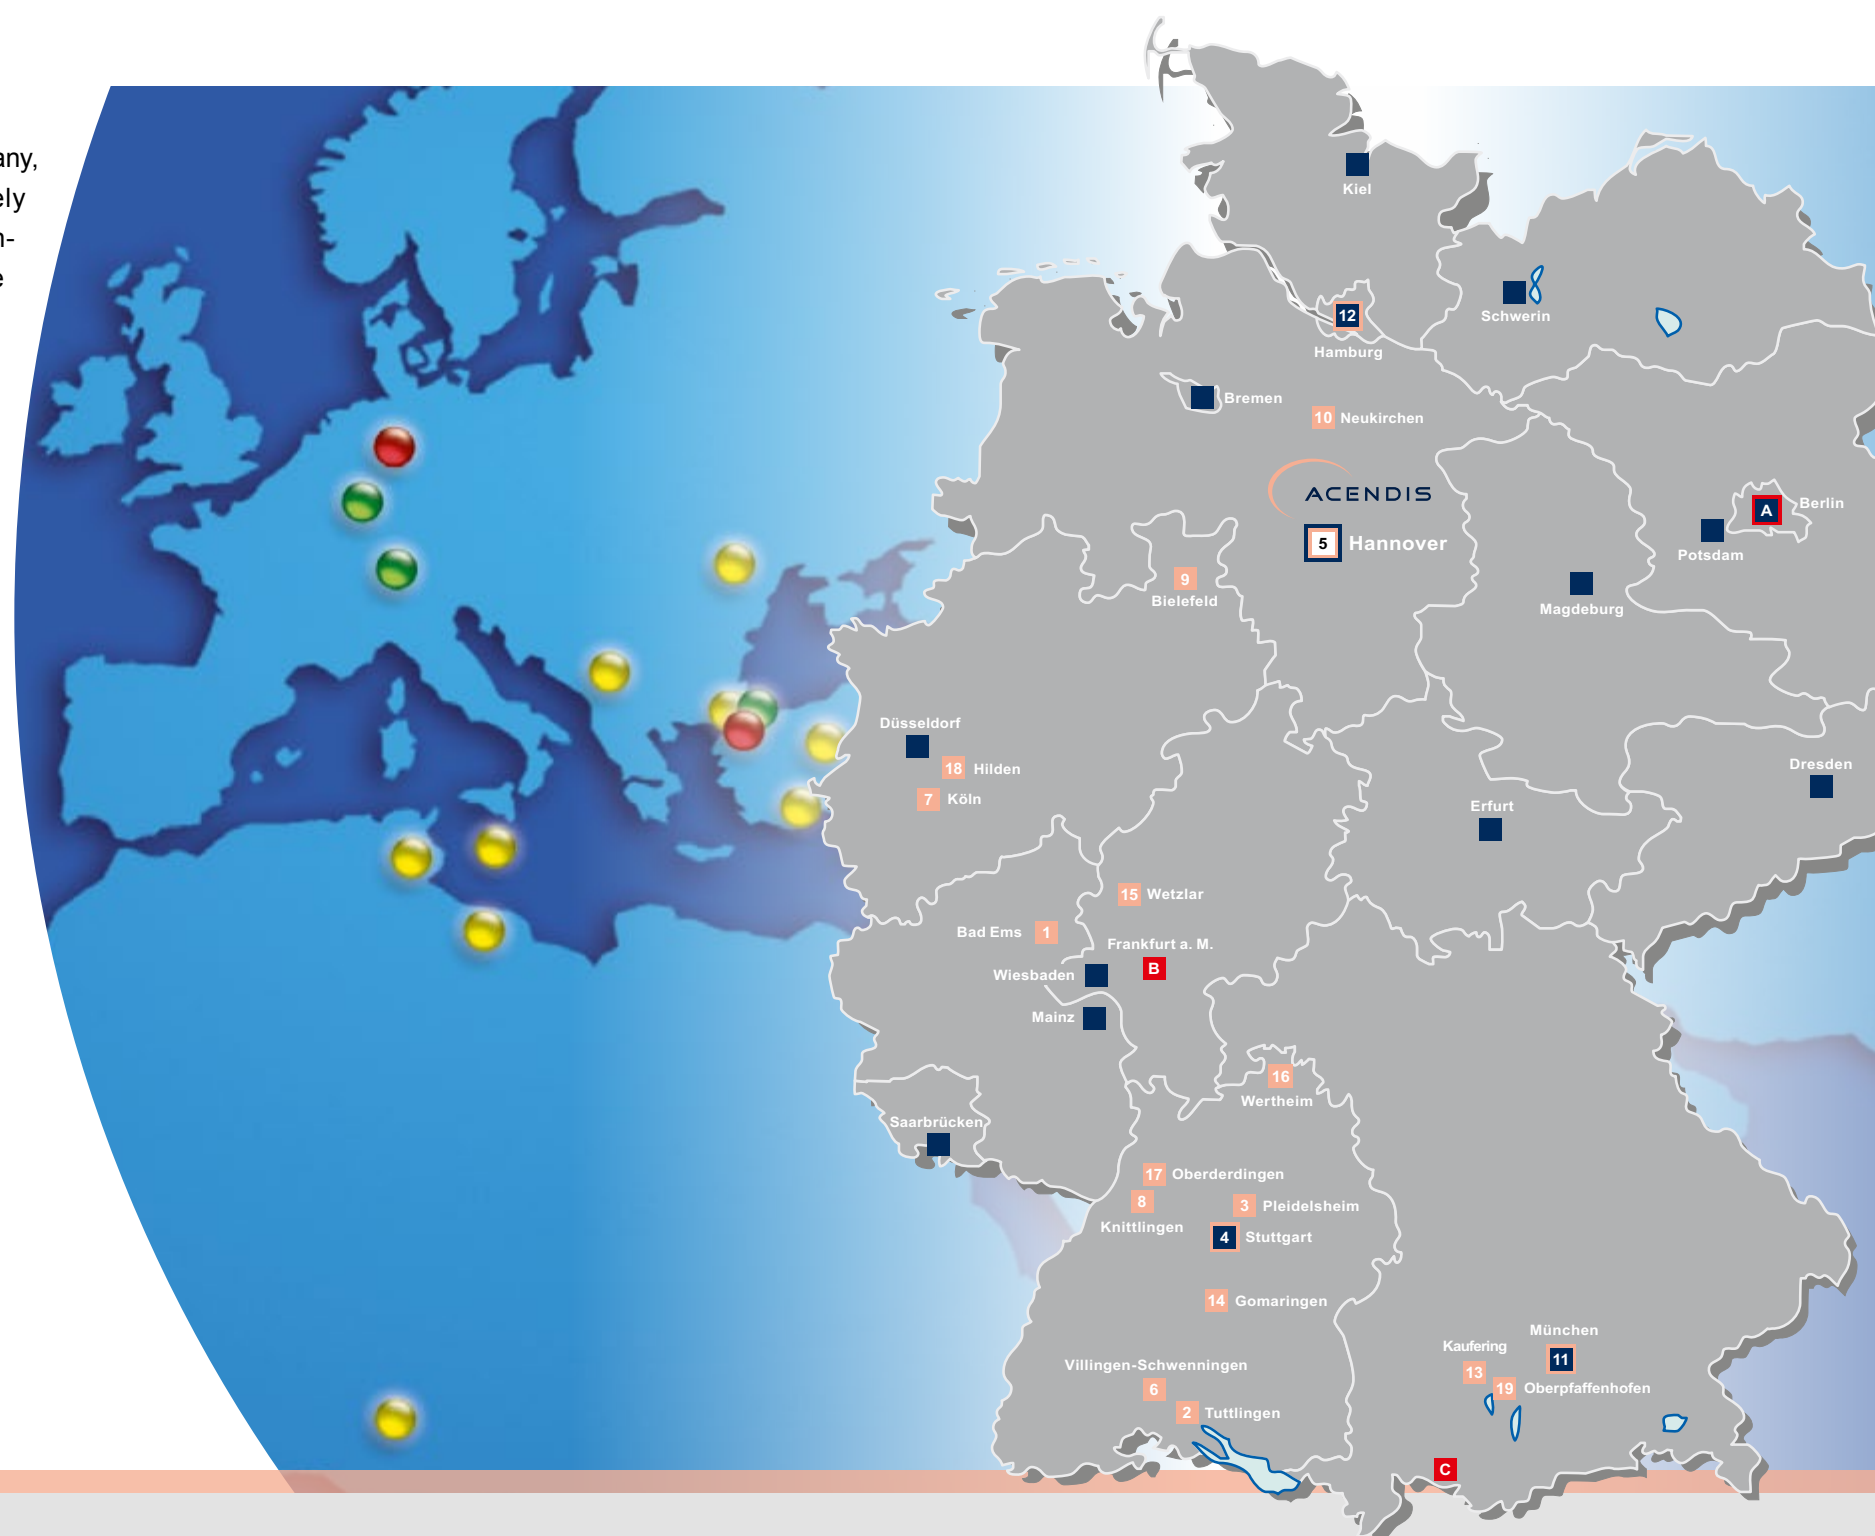

- Riyadh, Kingdom of Saudi Arabia

SCHILLER - Baar, Switzerland

Heinen + Löwenstein - Bad Ems, Germany

From our corporate headquarters in Hanover, Germany, we overview our project activities and work closely together with our German partners. Located in the centre of Germany, Hanover and the nearby airport make it easy for you to visit us and profit from ACENDIS and our experts and excellent connections. We are able to coordinate your appointments, accompany you to the headquarters of every important German manufacturer and arrange visits in the showrooms of our German partners.

The strong ties to our partners ensure that your project will be successful in every possible logistical, technical and financial way.

## Made in Germany – our medical partner network

The provincial capital of Lower Saxony, Hanover, the city on the banks of the river Leine, has approximately 525,000 inhabitants. The city was first mentioned under the name of "Hanovre" in the year 1150 AD.

The New Town Hall, Hanover

Hanover has the world's biggest industrial trade fair grounds. The information technology fair "Ce-BIT", the leading trade fair for floor coverings Domotex and the important sheet metal exhibition EuroBLECH are held every year in Hanover.

During the period of the Personal Union from 1714 to 1837, the British monarchs were all born in Hanover.

Hanover is also the home of one of the most renowned medical centres in Europe. The Hannover Medical School (MHH) is one of the world's leading university medical centres where leading international neuroscience experts like Dr. med. Dipl.-Ök. Rassoulia and Prof. Dr. med. Dr. h. c. mult. Samii worked on their area of expertise.

INI Hospital, Hanover

Professor Samii is also the founder and president of the International Neuroscience Institute (INI). Here, international experts offer all diagnostic and therapeutic possibilities of neurosciences under his leadership.

The multidisciplinary INI combines all physicians in neurology, neurosurgery, neuroradiology, ENT, orthopedics who treat patients with neurological disorders. The INI offers a disease-specific and patient-focused approach to care.

Royal Gardens of Herrenhausen, Hanover

Focus on Hanover – always worth a visit

## Özel OFM Hospital Antalya - Turkey

Area of 30.000 m<sup>2</sup>  
5 operating theatres  
130 beds  
47 outpatient rooms  
62 single private rooms  
41 intensive care beds  
15 neonatal intensive care units  
26 intensive care units

Our work begins far in advance of the actual ordering of the required medical technology. We are often called in during the early phases of the planning process of new construction projects for individual clinics, and are therefore able to improve the planning security of our clients throughout the entire project.

However, even if it "merely" involves the procurement of products from a selection of manufacturers and coordinated delivery within the framework of a conversion or modernisation project, the experience we have accumulated from more than 115 client projects provides genuine added value.

You can depend on reliable delivery of goods and equipment ordered according to your own schedule. Anyone who has ever had to bear the responsibility for a procurement project understands the magnitude of this advantage.

In the field of direct handling of goods, our expertise lies in placing orders with manufacturers to precisely match production lead times and delivery to our clients. We are able to buffer stock in our own warehousing facility to eliminate chronological differences making us independent of suppliers.

In the interests of our clients, we place great value in reducing the storage times of goods in our warehouse to an absolute minimum. This may sound simple, yet in reality the opposite is the case. It requires years of experience, specialised knowledge and the requisite connections. But then, this is the reason we are here.

## From planning to implementation

With more than 18 years experience, and over 115 completed projects to look back on, we not only provide in-depth knowledge of the market, but are also in a position to make competent product recommendations in related fields. We are not tied to specific brands, and are able to apply our knowledge of the strengths of specific products in the interests of our clients, regardless of the source. This gives our clients a significant edge over suppliers bound to a particular manufacturer.

Specialist fields in which our expertise is brought to bear

Secure the future of your hospital with optimised technical equipment for your operating theatres. We plan and deliver all the necessary technical equipment, up to and including the most sophisticated systems for the future. Perfect provision for the patient and well-planned operating procedures support efficiency, as well as economic work. You may rely on our experience from international TURN-KEY PROJECTS.

Germany

ACENDIS SHOWROOMS  
Germany

We fulfil your most exacting demands for intensive care units and in-patient wards.

Optimised technical outfitting and furniture systems facilitate intensive patient monitoring and treatment. Colours and shapes support the recovery process and the physical well-being of your patients. Patient rooms designed sensibly in both space and function guarantee safe operative and economic hospital procedures. Medical staff are perfectly supported in technical and logistical aspects. This facilitates work and procedures to not-inconsiderable degree.

Another plus for...  
ACENDIS TURN-KEY PROJECTS

Intensive care and modern equipment for wards –  
with the highest possible comfort for patients and staff

Medical technology all over the world is extremely extensive, diverse and interdisciplinary. It is virtually impossible for investors, hospital operators and purchasing departments to have an overview of this vast market. What is new? What topics are of interest? How are costs developing?

The ACENDIS database covers all important products in every field of medical technology. Our experts will assemble the right products tailor-made to your requirements, with due consideration for both the medical and economic aspects. This is the prerequisite to trouble-free deployment in medical facilities.

and more...

The procurement of equipment alone does not secure the success of a project. It is the delivery of that equipment to the client at the right time which makes the difference.

Extensive experience  
in the logistics of medical equipment

## Our reference – satisfied clients all over the world

Those who satisfy the needs and expectations of their clients are those who will continue to enjoy success in the future.

For your success, we rely on trust, partnership and expert knowledge.
